Lea cuidadosamente el panel lateral para precauciones adicionales y antidotas.

**NET CONTENTS: 1 LB. (453.59 g)**

## REN03020-BD Odor Absorbent & Eater

### DESCRIPTION

Odor Absorbent & Eater quickly absorbs water-based spills for fast and easy pickup. Absorbs 100 times its weight in seconds. The gel-like material can be removed with a dustpan, shovel or cardboard. Excellent in healthcare facilities for controlling odor and cleaning up vomit, urine, blood and after incontinence accidents. Other applications include schools, public transportation vehicles, police departments, travel terminals and more.

### DIRECTIONS

Sprinkle lightly over the entire spill. After about one minute, a gel will form and encapsulate the spilled material. Remove using a dustpan, shovel or a piece of cardboard. Discard into the trash. Easily rinse off any tools with water. Do not use with strong oxidizing agents, such as nitric acid. Personal Protection Equipment: in the event of potentially infectious or toxic spills, use the proper PPE as outlined in your hazardous materials handling policy. Consult the SDS for the spilled material, if necessary.

### DIRECCIONES

Espárzalo ligeramente sobre todo el derrame. Luego de un minuto se formará un gel que atraparé el material derramado. Remueva usando una pala para polvo o de jardín o un pedazo de cartón. Viértalo en la papelera. Enjuague fácilmente cualquier herramienta usada con agua. No lo utilice con agentes oxidantes fuertes como el ácido nítrico. Equipo de Protección Personal: en caso de una infección potencial o un derrame tóxico, utilice el equipo de protección adecuado como se señala en su política de manipulación de materiales peligrosos. Consulte la Hoja de Datos de Seguridad para materiales derramados, si es necesario.
